1. Introduction

1.1 Purpose of the System

TecAxle HRMS is a comprehensive enterprise Human Resource Management System (HRMS) and workforce-management platform. It is designed to manage the complete employee lifecycle — from recruitment and onboarding, through daily attendance, leave, performance, payroll, and benefits, all the way to offboarding and final settlement.

The system replaces a patchwork of spreadsheets, paper forms, biometric device exports, and disconnected payroll tools with a single source of truth. Every action is audited; every approval is configurable; every business rule is policy-driven rather than hard-coded.

1.2 Target Users

User type	What they do
HR administrators	Manage employees, contracts, lifecycle events, payroll, benefits, settings
System administrators	Configure the system, manage users / roles, monitor operational health
Payroll administrators	Run payroll periods, manage tax / social-insurance / calendar policies
Recruiters	Manage requisitions, postings, candidates, interviews, offers
Branch and department managers	Approve their team's requests; review team attendance
Employees	Use the self-service portal for attendance, leave, payslips, services
Operations / IT	Monitor alerts, work queues, reports, integrations

1.3 Main Business Value

- **Single source of truth** for every employee record, contract, and transaction.
- **Automated lifecycle transitions** — offer → onboarding → activation → resignation → clearance → settlement → deactivation.
- **Policy-driven payroll** — every multiplier comes from configuration; nothing is hard-coded.
- **Configurable approval workflows** — multi-step, role-based, with delegation and escalation.
- **Branch-scoped data access** — users only see the branches they are entitled to.
- **Bilingual interface** — English and Arabic, with full right-to-left support.
- **Real-time notifications** — request approvals, expiry alerts, system events.
- **Comprehensive audit trail** — every change is logged with field-level before/after.

1.4 Scope of the Manual

This manual covers:

- All **139** API controller modules (every business module in the system).
- All **114** permission resources and **27** permission actions.
- All **4** seeded roles and how each is used.
- All **68** status / lifecycle enums for every entity in the system.
- All **41** background jobs (scheduled tasks).
- All **10** notification types and their triggers.
- All **7** lifecycle domain events.
- All **85** company configuration settings.
- The complete approval-workflow framework with all **6** approver types.
- Both portals — admin (https://hrms.tecaxle.com/) and self-service (https://hrmsportal.tecaxle.com/).

> **Note:** Some features of the system are partially implemented or reserved for future enhancement. Where this is the case it is clearly marked as **Needs confirmation** or **Implementation unclear**.

2. System Overview

2.1 High-Level Description

TecAxle HRMS is a **single-company HRMS**: one organisation, one database, one set of settings. The system supports **multi-branch organisations** within that single company, with branch-scoped data access.

The system has three main components:

Component	URL	Purpose
Backend API	(internal)	Business logic, data, security, scheduled jobs
Admin Portal	https://hrms.tecaxle.com/	Full management for HR / payroll / IT / managers
Self-Service Portal	https://hrmsportal.tecaxle.com/	Employee and manager self-service

`[Screenshot needed: Login screen of both portals side by side]`

2.2 Main Modules

The system contains the following main modules (organised by area):

Dashboard

- Operational dashboard
- KPIs and quick actions

People

- **Organisation:** Users, Employees, Roles, Branches, Departments
- **HR Lifecycle:** Contracts, Transfers, Promotions, Salary Adjustments, Allowances, Allowance Requests, Job Grades
- **Recruitment:** Job Requisitions, Job Postings, Candidates, Applications, Interviews, Interview Feedback, Offer Letters
- **Onboarding:** Templates, Processes, Tasks, Dashboard
- **Offboarding:** Resignations, Terminations, Clearance, Final Settlements, End-of-Service, Exit Interviews
- **Workplace:** Documents (Categories, Employee Documents, Company Policies, Letter Templates, Letter Requests), Announcements, Assets (incl. Categories, Assignments, Maintenance), Employee Relations (Grievances, Disciplinary Actions, Investigations, Counselling), Surveys (Templates, Distributions, Responses), Expenses, Loans & Advances

Workforce

- **Time & Attendance:** Shifts, Shift Assignments, Attendance, Daily View, Monthly Report, Shift Swaps, On-Call Schedules, Attendance Correction Requests
- **Leave & Absence:** Employee Vacations, Employee Excuses, Compensatory Offs, Leave Encashments, Remote Work Requests, Leave Balances
- **Performance:** Review Cycles, Reviews, Goals, Competency Frameworks, Performance Improvement Plans (PIPs), 360 Feedback Requests
- **Training:** Categories, Courses, Programs, Sessions, Enrollments, Evaluations, Attendance, Certifications, Budgets
- **Succession:** Key Positions, Talent Profiles, Succession Plans, Career Paths

Payroll

- Salary Structures
- Payroll Periods (Process / Recalculate / Approve / Mark Paid / Cancel / Admin Unlock)
- Payroll Settings (Tax, Social Insurance, Insurance Providers, Calendar Policies)
- End-of-Service Policies
- Benefits (Plans, Open Enrollment Periods, Enrollments, Claims)

Operations

- **Approvals:** Pending Approvals, Approval History, Delegations

- **Operations Dashboard, Alerts, Approved Not Executed, Global Search**
- **Work Queues:** Overdue Approvals, Overdue Onboarding Tasks, Overdue Clearance Items, Unresolved Alerts, Auto-Checkout Review, PIP Follow-Through
- **Reports:** Attendance, Leave, Sessions, Audit Logs, Payroll, Compliance, Custom Reports, Scheduled Reports
- **Analytics:** Executive Dashboard, Headcount, Attrition, Recruitment, Training, Leave, Overtime, Payroll, Engagement
- **Timesheets:** Projects, Project Tasks, Periods, Timesheets
- **Settings:** Company Configuration, Overtime Configuration, Public Holidays, Vacation Types, Excuse Policies, Remote Work Policies, Workflows, Allowance Types, Allowance Policies, End-of-Service Policies, Leave Entitlements

2.3 User Types

User type	Portal	Default role
HR administrator	Admin	Admin
System administrator	Admin	SystemAdmin
Manager (branch / department)	Admin + Self-Service	Manager
Recruiter	Admin	Admin (typically)
Employee	Self-Service only	Employee

2.4 Access and Permission Model

Access is controlled by three layers:

1. **Authentication** — JWT-based login (email + password). Optional Two-Factor Authentication (TOTP).
2. **Authorisation** — Role + permission policies. Each API endpoint requires an authorisation policy. There are **141** unique policies enforced across **456** endpoint decorators.
3. **Branch scope** — Even authorised users see only the branches they are scoped to. System administrators have implicit access to all branches.

`[Screenshot needed: Roles and permissions matrix screen]`

3. Getting Started

3.1 Login Process

Standard sign-in

1. Open the appropriate portal: - HR / managers / system administrators → **https://hrms.tecaxle.com/** - Employees → **https://hrmsportal.tecaxle.com/**
2. Enter your **email address** and **password**.
3. Click **Login**.

`[Screenshot needed: Login form]`

Two-Factor Authentication (TOTP)

If 2FA is enabled on your account:

1. After your password is accepted, you are prompted for a **6-digit code**.
2. Open your authenticator app (Google Authenticator, Microsoft Authenticator, Authy, 1Password) and enter the current code.
3. If you have lost your authenticator device, click **Use a backup code**.

To enable 2FA on yourself: avatar menu → **Security** → **Enable 2FA** → scan the QR code → save the backup codes.

Forgot password

1. Click **Forgot password** on the login screen.
2. Enter your work email.
3. A reset link is emailed to you.
4. Click the link, set a new password, and sign in.

If no email arrives within 5 minutes, check Junk / Spam, then contact HR. A system administrator can reset your password manually from **People → Users**.

3.2 First-Time Access

If your account was newly created or migrated, you will be redirected to a **Change Password** screen on first login.

1. Enter the temporary password.
2. Choose a new password meeting the company password policy: - Minimum length (typically 8 characters; configurable) - At least one uppercase letter, one digit, one special character (configurable) - Cannot match any of your last few passwords (history is tracked)
3. Click **Change Password**.

You are signed in immediately. From this point on, you can use the new password.

3.3 Dashboard Overview

Admin Dashboard

`[Screenshot needed: Admin dashboard]`

Tiles include:

- **Organisation Snapshot** — total active employees, branches, departments, pre-hires, suspended.
- **Attendance Today** — Present, Absent, On Leave, Late, On Remote, On Holiday.
- **Pending Approvals** — total tasks waiting on action.
- **Recent Activity** — latest 10–20 system events.
- **Open Work Queues** — Overdue Approvals, Overdue Onboarding Tasks, Overdue Clearance, Unresolved Alerts, Auto-Checkout Review, PIP Follow-Through.
- **Quick Actions** — Add Employee, Process Payroll, Create Shift Assignment.

Self-Service Dashboard

`[Screenshot needed: Self-service dashboard]`

Tiles include:

- **Today's Attendance** — your check-in / out, status.
- **Leave Balance** — annual, sick, casual.
- **My Pending Requests** — vacations, excuses, expenses, letters.
- **Upcoming Events** — training sessions, certifications expiring.
- **Recent Payslips** — last few periods.
- **Latest Announcements**.
- **Quick Action Buttons** — Request Vacation, Request Excuse, Submit Correction, Submit Expense.

3.4 Navigation Menu

Layout zones

Zone	Purpose
Logo strip (top-left)	Click the gradient logo to open the **Module Launcher**
Sidebar (left)	Menu items grouped under the active *Area*
Top bar (top)	Breadcrumb (left), search, notifications, language, avatar
Main content	Pages, lists, forms, dashboards

Areas

The sidebar shows menu groups for **one area at a time**. Use the **Area Switcher** at the bottom of the sidebar to change area.

Admin portal areas:

Area	Covers
Dashboard	Landing page
People	Users, employees, roles, branches, departments, lifecycle, workplace
Workforce	Time, attendance, shifts, leave, performance, training, succession
Payroll	Salary structures, payroll periods, EOS policies, benefits
Operations	Approvals, work queues, reports, analytics, timesheets, settings

Self-service portal areas:

Area	Covers
Me	Dashboard, profile, attendance, leave & requests
Pay	Payslips, salary, allowances, benefits
Services	HR services, training, engagement
Approvals	Pending approvals (everyone) and team management (managers only)

Module Launcher

Click the gradient logo at the top-left to open the launcher. Currently active: **HR**. Placeholder modules for future: **CRM**, **Sales**, **Inventory**.

3.5 Common Buttons / Actions

These appear consistently across the system:

Button	Effect
Add / Create	Open the create form
Edit	Open the edit form for a row
View	Open the read-only detail page
Delete	Soft-delete a row (after confirmation)
Save	Persist form changes
Submit	Submit a form (e.g. a request) for processing
Cancel	Discard form changes / close a dialog
Approve	Approve a workflow step
Reject	Reject a workflow step
Return for Correction	Send a request back to the requester
Delegate	Reassign a workflow task to another approver
Resubmit	Resubmit a returned request
Export	Export the current list to CSV
Import	Bulk-upload data from a CSV template
Search	Filter the current list by text
Filter	Open advanced filters (date, status, branch, etc.)
Activate / Deactivate	Toggle status
Lock / Unlock	Lock or unlock a record (e.g. payroll period)
Reset Password	Set a temporary password for a user
Force Password Change	Force the user to change at next login
Download	Download a generated PDF or CSV
Mark Paid	Move a payroll period to Paid (final lock)
Recalculate	Re-run payroll calculation in Processed status

`[Screenshot needed: Typical list page with toolbar buttons]`

`[Screenshot needed: Typical edit form with sticky save / cancel footer]`

---

4. User Roles and Permissions

4.1 Seeded Roles

The system seeds **four** roles on first run.

SystemAdmin

- **System role** (cannot be edited / deleted).
- **Full access** to every resource × action combination, including system management.
- Default branch access: all branches (implicit).
- Used by IT and the seeded system users.

Admin

- **System role**.
- **Full HR / payroll / settings access**, but excluded from low-level system management actions.
- Used as the default for HR managers.

Manager

- **Editable role** (HR can adjust permissions).
- **Default permissions:** read team-related resources, approve team requests.
- Sample grants: `(Attendance, Read)`, `(Vacation, Approve)`, `(Employee, Read)`.
- Should be paired with branch access limited to the user's branch.

Employee

- **Editable role**.
- **Default permissions:** create their own requests, read their own data.
- Sample grants: `(Vacation, Create)`, `(Excuse, Create)`, `(Dashboard, Read)`.
- Used by every regular employee for self-service access.

> Custom roles can be created from **People → Roles → Add Role**. They are saved with bilingual names (English + Arabic) and a check-box matrix of (Resource, Action) grants.

4.2 Permission Resources (114 total)

The system defines **114** permission resources covering every entity. Examples:

`User`, `Role`, `Employee`, `Branch`, `Department`, `Shift`, `Attendance`, `Schedule`, `Report`, `Settings`, `Dashboard`, `Permission`, `Audit`, `Notification`, `System`, `PublicHoliday`, `VacationType`, `Vacation`, `ExcusePolicy`, `Excuse`, `Session`, `Workflow`, `Approval`, `LeaveBalance`, `Contract`, `Transfer`, `Promotion`, `SalaryAdjustment`, `JobGrade`, `Payroll`, `SalaryStructure`, `TaxConfiguration`, `SocialInsurance`, `Insurance`, `Resignation`, `Termination`, `Clearance`, `EndOfService`, `FinalSettlement`, `ExitInterview`, `AllowanceType`, `AllowancePolicy`, `AllowanceAssignment`, `AllowanceRequest`, `JobRequisition`, `JobPosting`, `Candidate`, `JobApplication`, `Interview`, `OfferLetter`, `OnboardingTemplate`, `OnboardingProcess`, `DocumentCategory`, `EmployeeDocument`, `CompanyPolicy`, `LetterRequest`, `LetterTemplate`, `ExpenseCategory`, `ExpensePolicy`, `ExpenseClaim`, `LoanType`, `LoanPolicy`, `LoanApplication`, `SalaryAdvance`, `AnnouncementCategory`, `Announcement`, `TrainingCategory`, `TrainingCourse`, `TrainingProgram`, `TrainingSession`, `TrainingEnrollment`, `TrainingEvaluation`, `EmployeeCertification`, `TrainingBudget`, `Grievance`, `DisciplinaryAction`, `Investigation`, `CounselingRecord`, `AssetCategory`, `Asset`, `AssetAssignment`, `AssetMaintenance`, `SurveyTemplate`, `SurveyDistribution`, `SurveyResponse`, `Analytics`, `SavedDashboard`, `Project`, `ProjectTask`, `TimesheetPeriod`, `Timesheet`, `KeyPosition`, `TalentProfile`, `SuccessionPlan`, `CareerPath`, `BenefitPlan`, `BenefitEnrollment`, `OpenEnrollmentPeriod`, `BenefitClaim`, `ShiftSwapRequest`, `OnCallSchedule`, `CompensatoryOff`, `LeaveEncashment`, `CustomReport`, `ScheduledReport`, and others.

> A small number of legacy resources (`SubscriptionPlan`, `TenantSubscription`, `Entitlement`) remain in the enum from the pre-v14.0 multi-tenant version of the system but are no longer used in the application. **Implementation**

> **unclear** — they should not be granted on any role.

4.3 Permission Actions (27 total)

Each action represents what a user can do on a resource:

Action	Meaning
Read	View / list records
View	View a single record (alternate naming)
Create	Create new records
Update	Modify records
Delete	Remove records (typically soft-delete)
Export	Export to CSV
Import	Bulk-import from CSV
Approve	Approve a request / workflow step
Reject	Reject a request / workflow step
Lock	Lock a record (e.g. payroll period)
Unlock	Unlock a record
ResetPassword	Reset another user's password
AssignRole	Assign a role to a user
RemoveRole	Remove a role from a user
AssignPermission	Grant a permission to a role
RemovePermission	Revoke a permission from a role
Download	Download a generated file
Upload	Upload a file
Archive	Archive a record
Restore	Restore an archived record
Activate	Activate a record / user
Deactivate	Deactivate a record / user
Assign	Assign a record to someone
Unassign	Unassign
Manage	Combined Create+Read+Update+Delete
Configure	Edit configuration
BulkCreate	Create multiple records at once

4.4 Role-Based Limitations

- **SystemAdmin** has implicit branch access to ALL branches and ALL permissions. Other roles must be explicitly granted permissions and branch access.
- **Branch access** is enforced on every list and detail page — a user without access to Branch X will not see employees, vacations, or payslips related to Branch X, even with full Read permissions.
- **Self-approval** is governed by the company-wide **Allow Self-Approval** setting (default off — users cannot approve their own requests).

- The **Workflow Fallback Approver** is invoked when no eligible approver can be resolved; configurable by role and / or specific user.

4.5 Permission Checks in Frontend and Backend

Frontend

- The admin sidebar dynamically hides menu items the user has no permission to access.
- Action buttons (Create, Edit, Delete, Approve) are hidden / disabled per row based on permission.
- Route guards prevent users from navigating to a page they cannot access.

Backend

- Every API endpoint is decorated with an `[Authorize(Policy = "...")]` attribute mapping to the required permission.
- **141** unique policies govern **456** endpoint actions.
- **Branch scope** is enforced in every list and detail query — even an authorised user cannot see data for a branch they are not scoped to.
- **Audit logging** records the user, action, and field-level before-and-after values for every mutation.

---

5. Module-by-Module User Guide

This section covers every business module in the system. For each module, the module purpose, who can use it, the relevant pages / routes, fields, validations, step-by-step instructions, business workflow, statuses, related notifications, and common errors are described.

5.1 Authentication and Account Management

Purpose: sign-in, sign-out, password management, two-factor authentication.

Who: every user.

Routes / endpoints:

- `POST /api/v1/auth/login` — sign in with email + password.
- `POST /api/v1/auth/refresh` — refresh access token.
- `POST /api/v1/auth/logout` — sign out.
- `POST /api/v1/auth/request-password-reset` — request password reset email.
- `POST /api/v1/auth/reset-password` — reset password using token.
- `POST /api/v1/auth/change-password` — change own password.
- `POST /api/v1/auth/enable-2fa` — start 2FA enrolment.
- `POST /api/v1/auth/confirm-2fa` — confirm 2FA enrolment.
- `POST /api/v1/auth/verify-2fa` — verify a 2FA code on login.
- `POST /api/v1/auth/register` — register a new user (SystemAdmin only — **Needs confirmation** whether enabled in production).
- `POST /api/v1/auth/verify-email` — verify email address using emailed token.
- `POST /api/v1/auth/resend-email-verification` — resend verification.

Validations:

- Email format must be valid.
- Password must meet the company password policy.
- After several failed attempts the account locks for the configured duration.

Common errors:

- `Invalid credentials` — wrong email or password.
- `Account locked` — wait the lockout duration or contact a SystemAdmin.
- `Must change password` — first-login redirect to the change-password screen.

`[Screenshot needed: Change password screen]`

5.2 Users (`/users`)

Purpose: manage portal user accounts.

Who: SystemAdmin, Admin (HR with the User permission).

Page: `/users`

Fields:

Field	Required	Description
Email	Yes	Login email — must be unique
Display Name	Yes	Full name shown in UI
Linked Employee	No	Optional link to an Employee record
Roles	Yes (≥ 1)	One or more assigned roles
Branch Access	Conditional	Required for non-SystemAdmin users
Active	Yes	Login is enabled when on
Must Change Password	No	Forces password change on next sign-in

Actions: Add User, Edit, Activate / Deactivate, Force Password Change, Reset Password, Unlock Account, Manage Roles, Manage Branch Access.

Common errors: - `Email already in use` — pick a different address. - `User must have at least one role` — assign a role.

5.3 Employees (`/employees`)

Purpose: master record for every person employed by the company.

Who: Admin, SystemAdmin, HR roles. Managers see their team only via the self-service portal.

Page: `/employees`

Tabs: Personal, Contact, Employment, Lifecycle, Compensation, Education, Work Experience, Visas, Dependents, Emergency Contacts, Documents, Profile Changes, Audit.

Required fields (create form): First Name, Last Name, Email, Hire Date, Branch, Department.

Statuses (combined):

Combination	Meaning
Pre-Hire = true, Active = true	Newly hired; in onboarding; payroll inactive
Active = true, Suspended = false	Active employee; full participation
Active = true, Suspended = true	Offboarding in progress; portal disabled
Active = false	Fully off-boarded; record retained

EmploymentStatus values: `Active`, `FullTime`, `PartTime`, `Contract`, `Intern`, `Consultant`, `Terminated`, `Inactive`, `Suspended`, `OnProbation`, `Resigned`.

ProbationStatus values: `NotApplicable`, `InProgress`, `Passed`, `Failed`, `Extended`.

Step-by-step: add an employee

1. **People → Employees → Add Employee**.
2. Fill the required fields.
3. Set the optional fields under each tab.
4. Click **Save**. The employee is created with `Active=true`.
5. Optionally, **Create User** to provision portal access.
6. Optionally, mark **Pre-Hire** if you want to start onboarding.

Step-by-step: bulk import

1. **People → Employees → Import**.
2. Download the CSV template.
3. Fill the template (one row per employee). Required columns: First Name, Last Name, Email, Hire Date, Branch Code, Department Code.
4. Save as CSV.
5. Click **Upload CSV**.
6. The system validates each row and shows errors inline. Fix and re-upload, or proceed with the valid subset.

Common errors: - `Email already exists` - `Branch / Department not found` - `Hire Date in the future` (if not allowed by policy) - `Invalid date format`

`[Screenshot needed: Employee detail page with tabs]`

5.4 Roles (`/roles`)

Purpose: define role names and their permission grants.

Who: SystemAdmin only (typically — controlled by the Role management permission).

Page: `/roles`

Fields: - Role Name (English) - Role Name (Arabic) - Description - (Resource, Action) check-box matrix — 114 × 27 = 3,078 possible combinations

Built-in roles (cannot be deleted): SystemAdmin, Admin, Manager, Employee.

Common error: `Role is in use — cannot delete` (revoke from all users first).

5.5 Branches (`/branches`)

Purpose: multi-branch organisation support.

Who: Admin, SystemAdmin.

Page: `/branches`

Fields: - Code (unique) - English Name, Arabic Name - Address - Contact phone, contact email - GPS coordinates (latitude, longitude) - Geofence radius (metres) - Branch Manager (optional — used by workflows that route to "BranchManager")

Map picker: click anywhere on the map to set GPS, or type an address to search. The geofence circle visualises the radius. GPS coordinates are retained as **branch metadata only** (the system no longer enforces GPS-based attendance).

`[Screenshot needed: Branch map picker]`

5.6 Departments (`/departments`)

Purpose: hierarchical departments (parent-child tree).

Page: `/departments`

Fields: Code, English Name, Arabic Name, Parent Department, Department Manager.

Tree view: drag-and-drop to re-parent.

5.7 HR Lifecycle Management

5.7.1 Contracts (`/employee-contracts`)

Purpose: track every employment contract.

Fields: Employee, Contract Type (Probation / FixedTerm / Indefinite / Internship / Project), Start Date, End Date, Status, Probation Period.

ContractStatus values: `Draft`, `Active`, `Expired`, `Terminated`, `Renewed`, `Suspended`.

Background job: `ContractExpiryAlertJob` runs daily at 03:00 UTC and notifies HR before contract expiry using the configured **Contract Expiry Alert Days** (default 30, 15, 7 days).

Action on contract expiry is configurable in **Company Configuration → Lifecycle**: - `NotifyOnly` — send notifications only (default) - `AutoMarkExpired` — set status Expired - `Suspend` — suspend the employee - `Deactivate` — fully deactivate

5.7.2 Transfers (`/employee-transfers`)

Purpose: branch / department transfers with audit trail.

Status values: `Pending`, `Approved`, `Rejected`, `InProgress`, `Completed`, `Cancelled`.

5.7.3 Promotions (`/employee-promotions`)

Purpose: rank / role promotions audit trail.

Status values: `Pending`, `Approved`, `Rejected`, `Effective`, `Cancelled`.

5.7.4 Salary Adjustments (`/salary-adjustments`)

Purpose: record every change to base salary.

Status values: `Draft`, `Pending`, `Approved`, `Rejected`, `Applied`, `Cancelled`.

> **Always create a salary adjustment** — never edit the salary directly. The payroll engine resolves salary by effective date, so a direct edit would not be applied to a period overlapping the change.

5.7.5 Allowances (`/allowances` and `/allowance-requests`)

Allowance Assignments are effective-dated, with statuses: `Active`, `Suspended`, `Expired`, `Cancelled`.

Allowance Requests go through a workflow with statuses: `Pending`, `Approved`, `Rejected`, `Applied`, `Withdrawn`, `Cancelled`.

5.7.6 Job Grades (`/job-grades`)

Fields: Code, English Name, Arabic Name, Description, Min/Max Salary, Optional Midpoint and Market Percentile.

5.8 Recruitment

5.8.1 Job Requisitions (`/recruitment/requisitions`)

Purpose: internal request to open a position.

Status values: `Draft`, `PendingApproval`, `Approved`, `Rejected`, `Open`, `OnHold`, `Filled`, `Cancelled`.

5.8.2 Job Postings (`/recruitment/postings`)

Purpose: publish an approved requisition.

Status values: `Draft`, `Published`, `Closed`, `Cancelled`.

5.8.3 Candidates (`/recruitment/candidates`)

Purpose: master list of candidates.

5.8.4 Applications (`/recruitment/applications`)

Purpose: candidate × posting links.

ApplicationStatus values: `New`, `Screening`, `ShortListed`, `InterviewScheduled`, `Interviewing`, `OfferPending`, `OfferExtended`, `OfferAccepted`, `OfferDeclined`, `Hired`, `Rejected`, `Withdrawn`.

5.8.5 Interviews (`/recruitment/interviews`)

Purpose: schedule interviews and capture feedback.

InterviewResult values: `Pending`, `Passed`, `Failed`, `NoShow`, `Rescheduled`.

5.8.6 Offers (`/recruitment/offers`)

Purpose: generate offer letters and manage acceptance.

OfferStatus values: `Draft`, `PendingApproval`, `Approved`, `Sent`, `Accepted`, `Declined`, `Expired`, `Withdrawn`.

Domain event: when an offer is **Accepted**, `OfferAcceptedEvent` fires. The system creates a pre-hire Employee, starts an onboarding process, and provisions a portal user (lifecycle automation).

5.9 Onboarding

5.9.1 Templates (`/onboarding/templates`)

Purpose: reusable task lists by category (Documentation, IT, HR, Training, Equipment, Access, Introduction).

5.9.2 Processes (`/onboarding/processes`)

Purpose: per-employee onboarding instances.

OnboardingStatus values: `NotStarted`, `InProgress`, `Completed`, `Cancelled`, `OnHold`.

OnboardingTaskStatus values: `Pending`, `InProgress`, `Completed`, `Skipped`, `Overdue`.

DocumentCollectionStatus values: `Pending`, `Submitted`, `Verified`, `Rejected`, `Expired`.

Background job: `OnboardingTaskOverdueJob` runs daily at 05:00 UTC and marks overdue tasks.

Domain event: `OnboardingCompletedEvent` fires when all required tasks complete. If `AutoActivateEmployeeOnOnboardingComplete` is enabled, the employee becomes Active automatically.

5.9.3 Onboarding Dashboard (`/onboarding/dashboard`)

Cross-employee view of who is in onboarding, completion percentages, overdue tasks.

5.10 Offboarding

5.10.1 Resignations (`/offboarding/resignations`)

ResignationStatus values: `Pending` , `Approved` , `Rejected` , `Withdrawn` .

Domain event: when approved, `ResignationApprovedEvent` fires. If `AutoCreateTerminationOnResignationApproved` is on, a Termination record is created automatically.

5.10.2 Terminations (`/offboarding/terminations`)

TerminationType values: `Resignation` , `Termination` , `EndOfContract` , `Retirement` , `Redundancy` , `MutualAgreement` .

Domain event: `TerminationCreatedEvent` . If `AutoCreateClearanceOnTermination` is on (default), a Clearance Checklist is created. If `AutoSuspendEmployeeOnTerminationCreated` is on, the employee is suspended.

5.10.3 Pending Clearance (`/offboarding/pending-clearance`)

ClearanceStatus values: `Pending` , `InProgress` , `Completed` .

Default clearance items when no template is configured: 1. Return company laptop / equipment 2. Return company ID card 3. Return company assets (phone, vehicle, keys) 4. Hand over project documentation 5. Knowledge transfer to designated colleague 6. IT access revocation 7. Final timesheet submission 8. Exit interview completed

Domain event: `ClearanceCompletedEvent` . Enables the Final Settlement (gated by `RequireClearanceCompleteBeforeFinalSettlement` if configured).

5.10.4 Final Settlements (`/offboarding/final-settlements`)

SettlementStatus values: `Draft` , `Calculated` , `PendingApproval` , `Approved` , `Paid` , `Cancelled` .

Components: Last salary (pro-rated), Leave Encashment, End-of-Service Benefit (per active policy), Notice Period, Outstanding Loans, Other line items.

Domain event: `FinalSettlementPaidEvent` . If `AutoDeactivateEmployeeOnFinalSettlementPaid` is on (default), the employee is deactivated.

5.10.5 End-of-Service Policies

Effective-dated policies with optional country filter. Saudi default seeded on first run. Tier-based: years-of-service × multiplier. Resignation deduction tier separately scaled.

The applied policy is snapshotted at calculation time, so historical EOS calculations are reproducible.

5.11 Time and Attendance

5.11.1 Shifts (`/shifts`)

Shift types: Regular, Flexible, Split, Rotating, Night (data-driven on `ShiftType.TimeBased` or `HoursOnly`).

ShiftStatus values: `Active` , `Inactive` , `Draft` , `Archived` .

5.11.2 Shift Assignments (`/shifts/assign`)

ShiftAssignmentStatus values: `Pending` , `Active` , `Inactive` , `Expired` , `Cancelled` .

Priority rule: when multiple assignments overlap on a date, the highest-priority active assignment wins.

5.11.3 Attendance Dashboard (`/attendance`) and Daily View (`/attendance/daily`)

AttendanceStatus values: `Present` , `Absent` , `Late` , `EarlyLeave` , `OnLeave` , `DayOff` , `Overtime` , `Incomplete` , `Holiday` , `SickLeave` , `Pending` , `OnDuty` , `Excused` , `RemoteWork` .

Background jobs: - `DailyAttendanceGenerationJob` — daily 02:00 UTC — generates daily records for all active employees. - `EndOfDayAttendanceFinalizationJob` — daily 23:59 UTC — converts pending → absent for past dates. -

`ShiftDrivenAutoCheckOutJob` — hourly — auto-checks out employees after shift end + grace period (branch-timezone aware).

5.11.4 Attendance Correction Requests

Purpose: employees submit corrections for missed scans. Admin reviews / approves.

Configurable retroactive window via `AttendanceCorrectionMaxRetroactiveDays` (default 14 days).

5.11.5 Monthly Report (`/attendance/monthly-report`)

Lock the period when ready for payroll. Locked records cannot be edited except via a SystemAdmin override.

5.11.6 Shift Swap Requests (`/attendance/shift-swaps`)

ShiftSwapStatus values: `Pending`, `AcceptedByPeer`, `DeclinedByPeer`, `Approved`, `Rejected`, `Cancelled`.

5.11.7 On-Call Schedules (`/attendance/on-call`)

Plan rotations with calendar view; coverage gaps highlighted.

5.12 Leave and Absence

5.12.1 Employee Vacations (`/employee-vacations`)

ApprovalStatus values: `Pending`, `Approved`, `Rejected`, `Cancelled`.

Validation: uses `VacationBalanceRule` — checks the balance before approval.

Calendar view: `GET /api/v1/employee-vacations/calendar`.

Bulk-create endpoint: `POST /api/v1/employee-vacations/bulk` (HR can submit multiple at once).

5.12.2 Employee Excuses (`/employee-excuses`)

Hour-based excuses. Same workflow / status set as vacations.

5.12.3 Compensatory Offs (`/leave-management/compensatory-offs`)

CompensatoryOffStatus values: `Available`, `Used`, `Expired`, `Cancelled`.

Background job: `CompensatoryOffExpiryJob` — daily 02:30 UTC.

5.12.4 Leave Encashments (`/leave-management/leave-encashments`)

LeaveEncashmentStatus values: `Pending`, `Approved`, `Rejected`, `Processed`, `Paid`, `Cancelled`.

5.12.5 Remote Work Requests (`/remote-work`)

RemoteWorkRequestStatus values: `Pending`, `Approved`, `Rejected`, `Cancelled`.

5.12.6 Leave Balances (`/leave-balances`)

Read-only summary per employee per leave type.

Background job: `MonthlyLeaveAccrualJob` — monthly on day 1 at 01:00 UTC. `LeaveCarryoverExpiryJob` — daily 04:00 UTC, claws back unused carry-over.

5.13 Performance Management

5.13.1 Review Cycles (`/performance/cycles`)

ReviewCycleStatus values: `Planning`, `Active`, `InReview`, `Calibration`, `Completed`, `Cancelled`.

5.13.2 Reviews (`/performance/reviews`)

ReviewStatus values: `Draft`, `SelfAssessmentPending`, `SelfAssessmentCompleted`, `ManagerReviewPending`, `ManagerReviewCompleted`, `PendingApproval`, `Approved`, `Acknowledged`, `Disputed`.

Background job: `ReviewCycleReminderJob` — daily 07:00 UTC.

5.13.3 Goals (`/performance/goals`)

GoalStatus values: `Draft`, `Active`, `InProgress`, `Completed`, `Cancelled`, `Deferred`.

5.13.4 Competencies (`/performance/competencies`)

Frameworks → competencies → assessments.

5.13.5 Performance Improvement Plans (`/performance/pips`)

PipStatus values: `Draft`, `Active`, `Extended`, `CompletedSuccessful`, `CompletedUnsuccessful`, `Cancelled`.

Background jobs: - `PIPExpiryCheckJob` — daily 06:00 UTC — notifies manager when end date reached. - `PipFollowThroughJob` — hourly — creates pending Resignation Request when a PIP transitions to `CompletedUnsuccessful` (per business rules).

5.13.6 360 Feedback (`/performance/feedback-requests`)

FeedbackStatus values: `Requested`, `Submitted`, `Expired`, `Declined`.

5.14 Training and Development

5.14.1 Categories, Courses, Programs, Sessions

TrainingProgramStatus values: `Draft`, `Active`, `Completed`, `Archived`.

TrainingSessionStatus values: `Scheduled`, `InProgress`, `Completed`, `Cancelled`.

5.14.2 Enrollments

TrainingEnrollmentStatus values: `Pending`, `Approved`, `Rejected`, `InProgress`, `Completed`, `Cancelled`, `NoShow`.

Background job: `TrainingSessionReminderJob` — daily 11:00 UTC.

5.14.3 Certifications

CertificationStatus values: `Active`, `Expired`, `Revoked`, `Pending`.

Background job: `CertificationExpiryAlertJob` — daily 10:00 UTC.

5.14.4 Budgets

Per-department or per-program; spent auto-tracked.

5.15 Succession Planning

5.15.1 Key Positions, Talent Profiles, Plans, Career Paths

SuccessionPlanStatus values: `Draft`, `Active`, `UnderReview`, `Approved`, `Archived`.

CandidateSuccessionStatus values: `Active`, `Promoted`, `Removed`, `OnHold`.

Background jobs: - `SuccessionPlanReviewReminderJob` — monthly day 1 at 05:00 UTC. - `TalentProfileSyncJob` — monthly day 1 at 04:00 UTC — syncs latest performance ratings.

5.16 Payroll

5.16.1 Salary Structures (`/payroll/salary-structures`)

Define base salary per employee, currency, effective date, frequency.

5.16.2 Payroll Periods (`/payroll/periods`)

PayrollPeriodStatus values: `Draft`, `Processing`, `Processed`, `PendingApproval`, `Approved`, `Paid`, `Cancelled`.

Period actions and endpoints:

Action	Endpoint	When	Effect
Create	`POST /api/v1/payroll-periods`	—	New period in Draft
Process	`POST /api/v1/payroll-periods/{id}/process`	Draft	Computes payslips; → Processed
Recalculate	`POST /api/v1/payroll-periods/{id}/recalculate`	Processed	Re-runs calc; replaces line items
Approve	`POST /api/v1/payroll-periods/{id}/approve`	Processed	Locks calc; → Approved
Mark Paid	`POST /api/v1/payroll-periods/{id}/mark-paid`	Approved	Locks period; payslips visible to employees
Cancel	`POST /api/v1/payroll-periods/{id}/cancel`	Draft / Processing	Reverts
Admin Unlock	`POST /api/v1/payroll-periods/{id}/admin-unlock`	Paid	SystemAdmin only; requires reason
View records	`GET /api/v1/payroll-periods/{id}/records`	Any	Employee payslips for period
Run audit	`GET /api/v1/payroll-periods/{id}/run-audit`	Any	Append-only action history

PayrollRecordStatus values: `Pending`, `Calculated`, `Adjusted`, `Finalized`.

PayrollRunStatus values: `Running`, `Completed`, `Failed`, `CompletedWithWarnings`.

PayrollRunItemStatus values: `Succeeded`, `SkippedNoSalary`, `SkippedInactive`, `FailedWithError`, `CompletedWithWarnings`.

`[Screenshot needed: Payroll period detail with action toolbar]`

`[Screenshot needed: Payslip line-item breakdown]`

5.16.3 Payroll Settings (`/payroll/settings`)

Sub-pages: Tax Configurations, Social Insurance, Insurance Providers, Calendar Policies.

Calendar Policy basis: `CalendarDays`, `WorkingDays`, `FixedBasis` (e.g. 26).

5.16.4 End-of-Service Policies

CRUD pages for policies and tiers. Saudi default seeded.

5.17 Benefits

5.17.1 Plans (`/benefits/plans`)

Define Health / Dental / Vision / Life / Retirement plans with provider, coverage, contributions.

5.17.2 Enrollment Periods (`/benefits/enrollment-periods`)

EnrollmentPeriodStatus values: `Upcoming`, `Open`, `Closed`, `Cancelled`.

Background job: `OpenEnrollmentPeriodActivatorJob` — daily 00:05 UTC — opens / closes periods automatically.

5.17.3 Enrollments (`/benefits/enrollments`)

BenefitEnrollmentStatus values: `Pending`, `Active`, `Suspended`, `Terminated`, `Cancelled`, `PendingApproval`.

Background job: `BenefitEnrollmentExpiryJob` — daily 01:15 UTC — terminates expired enrollments.

5.17.4 Claims (`/benefits/claims`)

BenefitClaimStatus values: `Submitted`, `UnderReview`, `Approved`, `PartiallyApproved`, `Rejected`, `Paid`, `Cancelled`.

Background job: `BenefitDeductionSyncJob` — monthly day 1 at 03:00 UTC — syncs benefit deductions to payroll.

5.18 Workplace Services

5.18.1 Documents

- **Categories** — folders.
- **Employee Documents** — `DocumentVerificationStatus`: `Pending`, `Verified`, `Rejected`, `Expired`. Background job: `DocumentExpiryAlertJob` — daily 08:00 UTC.
- **Company Policies** — `PolicyStatus`: `Draft`, `Published`, `Archived`. Acknowledgement-required flag enforces user click.
- **Letter Templates** — bilingual reusable templates.
- **Letter Requests** — `LetterRequestStatus`: `Pending`, `Approved`, `Generated`, `Rejected`, `Cancelled`.

5.18.2 Announcements

AnnouncementStatus values: `Draft`, `Scheduled`, `Published`, `Expired`, `Archived`.

Background jobs: - `AnnouncementSchedulerJob` — publishes scheduled announcements when start date passes. - `AnnouncementExpiryJob` — daily — marks expired announcements.

5.18.3 Assets

- **Assets** — `AssetStatus`: `Available`, `Assigned`, `InMaintenance`, `Retired`, `Lost`, `Damaged`, `Disposed`.
- **Assignments** — `AssetAssignmentStatus`: `Active`, `Returned`, `Overdue`, `Lost`, `Damaged`.
- **Maintenance** — `MaintenanceStatus`: `Scheduled`, `InProgress`, `Completed`, `Cancelled`.

Background jobs: - `AssetWarrantyExpiryAlertJob` — daily 14:00 UTC. - `OverdueAssetReturnAlertJob` — daily 15:00 UTC.

5.18.4 Employee Relations

- **Grievances** — `GrievanceStatus`: `Filed`, `UnderReview`, `InvestigationStarted`, `PendingResolution`, `Resolved`, `Escalated`, `Closed`, `Withdrawn`. Background job: `GrievanceSlaAlertJob` — daily 12:00 UTC.
- **Disciplinary Actions** — `DisciplinaryActionStatus`: `Draft`, `Pending`, `Approved`, `Acknowledged`, `Appealed`, `AppealResolved`, `Completed`, `Cancelled`.
- **Investigations** — `InvestigationStatus`: `Open`, `InProgress`, `PendingReview`, `Completed`, `Closed`, `Cancelled`.
- **Counseling** — Background job: `CounselingFollowUpReminderJob` — daily 13:00 UTC.

5.18.5 Surveys

SurveyDistributionStatus values: `Draft`, `Scheduled`, `Active`, `Closed`, `Cancelled`.

SurveyParticipantStatus values: `Invited`, `Started`, `Completed`, `Declined`, `Expired`.

Background jobs: - `SurveyDistributionActivatorJob` — hourly. - `SurveyExpiryJob` — hourly. - `SurveyReminderJob` — daily 09:00 UTC.

5.18.6 Expenses

ExpenseClaimStatus values: `Draft`, `Submitted`, `PendingApproval`, `Approved`, `Rejected`, `Reimbursed`, `PartiallyReimbursed`, `Cancelled`.

5.18.7 Loans and Salary Advances

LoanApplicationStatus values: `Draft`, `Pending`, `Approved`, `Rejected`, `Active`, `FullyPaid`, `DefaultedPayment`, `Cancelled`.

LoanRepaymentStatus values: `Scheduled`, `Paid`, `Overdue`, `Waived`.

SalaryAdvanceStatus values: `Pending`, `Approved`, `Rejected`, `Deducted`, `Cancelled`.

Background job: `LoanRepaymentReminderJob` — daily 09:00 UTC.

5.19 Timesheets

TimesheetPeriodStatus values: `Open`, `Closed`, `Locked`.

TimesheetStatus values: `Draft`, `Submitted`, `Approved`, `Rejected`, `Recalled`.

Background jobs: - `TimesheetPeriodGenerationJob` — daily 03:00 UTC — auto-creates next period. - `TimesheetPeriodClosureJob` — daily 01:30 UTC — auto-closes overdue periods. - `TimesheetSubmissionReminderJob` — daily 08:00 UTC — reminds employees near deadline.

5.20 Self-Service Portal Features

The self-service portal at https://hrmsportal.tecaxle.com/ surfaces a personalised view of every relevant module. Refer to the **Self-Service User Manual** (`SELF_SERVICE_USER_MANUAL.md`) for end-user step-by-step guidance.

Pages include:

Me area: Employee Dashboard, My Profile, My Attendance, Attendance Corrections, Shift Swap Requests, My On-Call, My Timesheets, Vacation Requests, Excuse Requests, Remote Work Requests, My Compensatory Offs, My Leave Encashments.

Pay area: My Payslips, My Salary, My Allowances, My Benefits.

Services area: My Resignation, My Documents, My Letters, My Expenses, My Loans, My Assets, My Grievances, My Disciplinary, My Training, Training Catalog, My Certifications, My Career, Announcements, My Surveys.

Approvals area: Pending Approvals, Manager Dashboard (managers only), Team Members (managers only).

---

6. Admin Guide

6.1 System Setup and Configuration

Initial setup checklist

After deployment:

1. Sign in with the seeded SystemAdmin account (see Appendix A).
2. **Settings → Company Configuration → General** — set company name (English + Arabic), time zone, currency, working week, fiscal year start.
3. Create your **Branches** — one row per physical / organisational unit.
4. Create your **Departments** — set parent-child hierarchy.
5. Create your **Job Grades** if you use grade-based compensation.
6. Create at least one **Vacation Type** beyond the seeded defaults if needed.
7. Create your **Shifts** and assign them at the branch / department / employee level.
8. Configure **Public Holidays** for each branch.
9. Configure **Overtime Configuration** per branch.
10. Set up **Workflow Definitions** — at least one per request type (vacation, excuse, etc.).
11. Configure **Allowance Types** with taxable / social-insurable flags.
12. Configure **Tax Configurations**, **Social Insurance**, **Insurance Providers**, **Calendar Policies**.
13. Configure your **End-of-Service Policy** (Saudi default is seeded).
14. Set up **Benefit Plans** if applicable.
15. Define **Onboarding Templates** (default + branch / department specific).
16. Define **Letter Templates** for HR letters.
17. Disable / replace seeded sample accounts before going live.

6.2 Master Data Management

Master data	Page	Notes
Branches	`/branches`	GPS / map picker
Departments	`/departments`	Hierarchical
Job Grades	`/job-grades`	Salary bands
Shifts	`/shifts`	Multiple types
Public Holidays	`/settings/public-holidays`	Per-branch
Vacation Types	`/vacation-types`	Paid / unpaid flag, balance rules
Allowance Types	`/settings/allowance-types`	Taxable, social-insurable, basis
Allowance Policies	`/settings/allowance-policies`	Eligibility
Excuse Policies	`/settings/excuse-policies`	Hour balance per period
Remote Work Policies	`/settings/remote-work-policy`	Eligibility, blackouts
Tax Configurations	`/payroll/settings → tax-configs`	Brackets
Social Insurance	`/payroll/settings → social-insurance`	Rates, max, nationality filter
Insurance Providers	`/payroll/settings → insurance-providers`	Premiums
Calendar Policies	`/payroll/settings → calendar-policies`	Daily-rate basis
End-of-Service Policies	(settings)	Tiers

6.3 User Management

See Section 5.2 and Roles.

6.4 Role / Permission Management

See Section 4 for the full permission system. Manage from **People → Roles**.

6.5 Lookup / Configuration Screens

All under the **Operations → Settings** area: - Company Configuration (singleton) - Settings Dashboard - Overtime - Public Holidays - Vacation Types - Excuse Policies - Remote Work Policy - Workflows - Leave Entitlements - Allowance Types - Allowance Policies - End-of-Service Policies

6.6 Audit Logs

Page: Operations → Reports → Audit Logs (`/reports/audit-logs`).

Every mutation (create / update / delete) is logged with: - Timestamp - User who acted - Entity type, entity ID - Action (Create / Update / Delete) - Before-value, after-value (field-level) - IP address (where available)

`[Screenshot needed: Audit log page with filters]`

6.7 Background Jobs (Admin Visibility)

The system runs **41** scheduled jobs. Job execution failures surface in **Operations → Operational Alerts**.

Job	Schedule	Purpose
AnalyticsSnapshotJob	Daily 01:00 UTC	Pre-computes analytics snapshots
AnnouncementExpiryJob	Daily	Expires announcements
AnnouncementSchedulerJob	(scheduled)	Publishes scheduled announcements
ApplyScheduledProfileChangesJob	Daily 01:00 UTC	Applies effective-dated profile changes
AssetWarrantyExpiryAlertJob	Daily 14:00 UTC	Asset warranty alerts
BenefitDeductionSyncJob	Monthly day 1, 03:00	Syncs benefit deductions to payroll
BenefitEnrollmentExpiryJob	Daily 01:15 UTC	Terminates expired benefit enrollments
CertificationExpiryAlertJob	Daily 10:00 UTC	Certification expiry alerts
CompensatoryOffExpiryJob	Daily 02:30 UTC	Expires comp-off
ContractExpiryAlertJob	Daily 03:00 UTC	Contract expiry alerts; fires `ContractExpiredEvent`
CounselingFollowUpReminderJob	Daily 13:00 UTC	Counsellor follow-up reminders
DailyAttendanceGenerationJob	Daily 02:00 UTC	Generates daily attendance
DocumentExpiryAlertJob	Daily 08:00 UTC	Document expiry alerts
EndOfDayAttendanceFinalizationJob	Daily 23:59 UTC	Finalises Pending → Absent
ExpireTemporaryAllowancesJob	Daily 02:00 UTC	Expires temporary allowances
FrozenWorkflowCleanupJob	Daily 03:00 UTC	Cancels long-frozen workflows (>90 days)
GrievanceSlaAlertJob	Daily 12:00 UTC	Grievance SLA alerts
LeaveCarryoverExpiryJob	Daily 04:00 UTC	Claws back expired carry-over
LoanRepaymentReminderJob	Daily 09:00 UTC	Loan repayment reminders
MonthlyAnalyticsRollupJob	Monthly day 1, 02:00	Aggregates monthly analytics

MonthlyLeaveAccrualJob	Monthly day 1, 01:00	Monthly leave accrual
OnboardingTaskOverdueJob	Daily 05:00 UTC	Marks overdue onboarding tasks
OpenEnrollmentPeriodActivatorJob	Daily 00:05 UTC	Opens / closes benefit enrollment
OperationalFailureSurfacerJob	Hourly	Surfaces lifecycle automation failures
OverdueAssetReturnAlertJob	Daily 15:00 UTC	Overdue asset return alerts
PIPExpiryCheckJob	Daily 06:00 UTC	PIP end-date notifications
PipFollowThroughJob	Hourly	Triggers downstream actions on failed PIPs
ReviewCycleReminderJob	Daily 07:00 UTC	Performance review reminders
ScheduledReportExecutionJob	Hourly	Runs scheduled reports
ShiftDrivenAutoCheckOutJob	Hourly	Auto-checkout (shift-driven)
SuccessionPlanReviewReminderJob	Monthly day 1, 05:00	Succession plan review
SurveyDistributionActivatorJob	Hourly	Activates survey distributions
SurveyExpiryJob	Hourly	Closes survey distributions
SurveyReminderJob	Daily 09:00 UTC	Survey reminders
TalentProfileSyncJob	Monthly day 1, 04:00	Sync performance ratings
TimesheetPeriodClosureJob	Daily 01:30 UTC	Auto-close timesheet periods
TimesheetPeriodGenerationJob	Daily 03:00 UTC	Auto-generate next timesheet period
TimesheetSubmissionReminderJob	Daily 08:00 UTC	Timesheet reminders
TrainingSessionReminderJob	Daily 11:00 UTC	Training session reminders
VisaExpiryAlertJob	Daily 04:00 UTC	Visa expiry alerts
WorkflowTimeoutProcessingJob	Hourly	Workflow step timeouts (Expire / Escalate / AutoApprove / AutoReject)

> All times are UTC unless overridden. **Needs confirmation:** the precise schedule of `AnnouncementSchedulerJob` is not visible in the central scheduler — assumed to be on the same hourly tick as other publication jobs.

6.8 Operational Alerts (`/operational-alerts`)

Background-job and lifecycle-automation failures show here. Each alert has: - Timestamp - Alert type (job name) - Error - Affected entity - Resolution status (Open / Acknowledged / Resolved / Suppressed)

Actions: Acknowledge, Resolve (with note), Suppress.

6.9 Approved Not Executed (`/approved-not-executed`)

Workflow-approved requests whose downstream side-effect has not been recorded yet. Useful for catching execution lag.

6.10 Work Queues

Six queues surface items needing administrator attention:

1. Overdue Approvals
2. Overdue Onboarding Tasks
3. Overdue Clearance Items
4. Unresolved Alerts

5. Auto-Checkout Review
6. PIP Follow-Through

`[Screenshot needed: Work queue list page]`

---

7. Workflow and Approval Guide

7.1 Workflow Engine Overview

The system runs a **configurable, multi-step approval workflow engine**. Every request type (vacation, excuse, expense, salary advance, etc.) can have one or more workflow definitions. When a request is submitted, a workflow instance is created from the active definition, and approvers act on each step in sequence.

7.2 Approver Types (6 total)

ApproverType	Resolves to
DirectManager	The requester's direct line manager
Role	Any user with the configured role (with optional assignment strategy)
SpecificUser	A specific user
DepartmentHead	The manager of the requester's department
BranchManager	The manager of the requester's branch
System	An automated system step (no human approver)

For Role-based steps, an optional **role assignment strategy** picks among multiple eligible users: - First Match - Round Robin - Least Pending Approvals - Fixed Priority

7.3 Seeded Workflow Definitions (4 total)

Name	Applies to	Steps	Approver chain
Default Vacation Approval	Vacation requests	1	DirectManager (48h timeout)
Default Excuse Approval	Excuse requests	1	DirectManager (24h timeout)
Default Remote Work Approval	Remote work requests	1	DirectManager (48h timeout)
Default Attendance Correction Approval	Attendance correction requests	1	DirectManager (24h timeout)

> Additional workflow definitions can be created in **Operations → Settings → Workflows**. Workflow definitions are versioned; existing in-flight workflow instances continue to use the snapshot at submission time.

7.4 Workflow Statuses

WorkflowStatus values: `Pending`, `InProgress`, `Approved`, `Rejected`, `Cancelled`, `Expired`, `Frozen`, `ReturnedForCorrection`, `FailedRouting`.

Status	Meaning
Pending	Initial state; waiting on first approver
InProgress	At least one step approved; awaiting next
Approved	All steps approved; downstream effect applied
Rejected	Any approver rejected — terminal
Cancelled	Requester withdrew
Expired	Step timed out and was set to terminal expire
Frozen	Temporarily paused (rare; cleaned up after 90 days by `FrozenWorkflowCleanupJob`)
ReturnedForCorrection	Sent back to requester; awaiting Resubmit
FailedRouting	No eligible approver could be resolved; falls to fallback approver

7.5 Approval Actions

ApprovalAction values: `Approved`, `Rejected`, `Delegated`, `Skipped`, `TimedOut`, `AutoApproved`, `AutoRejected`, `Escalated`, `ReturnedForCorrection`, `FailedNoApprover`, `Resubmitted`.

7.6 Possible Decisions

When an approver opens a pending task, they can:

1. **Approve** — `POST /api/v1/approvals/{id}/approve` — moves to next step or terminal Approved.
2. **Reject** — `POST /api/v1/approvals/{id}/reject` — terminates as Rejected.
3. **Return for Correction** — `POST /api/v1/approvals/{id}/return-for-correction` — sends back with comment.
4. **Delegate** — `POST /api/v1/approvals/{id}/delegate` — re-assigns to another user.
5. **Cancel** — `POST /api/v1/approvals/{id}/cancel` — cancels the workflow (rare, typically administrator-only).

The requester can:

6. **Resubmit** — `POST /api/v1/approvals/{id}/resubmit` — resubmits a returned request.

7.7 Standing Delegations

Approvers can configure a standing delegation that automatically routes incoming tasks to an alternate user during a date range:

- `POST /api/v1/approvals/delegations` — create a standing delegation.
- `DELETE /api/v1/approvals/delegations/{id}` — remove.

Delegation depth is bounded (default max 2). Cycles are rejected.

7.8 What Happens After Approval / Rejection

After a workflow reaches **Approved**, downstream business effects are applied:

- **Vacation:** balance is deducted; attendance is updated for the requested days.
- **Excuse:** attendance for the affected hours is adjusted.
- **Remote Work:** attendance status is set to Remote on the affected day.
- **Attendance Correction:** the underlying transaction is updated; the day's attendance is recalculated.
- **Salary Advance / Loan / Allowance Request:** the configured downstream record is created or updated.
- **Resignation:** triggers `ResignationApprovedEvent` → optionally creates Termination → triggers Clearance.
- **Salary Adjustment / Promotion / Transfer:** applied on the effective date.

After **Rejected** or **Cancelled**, no downstream effect occurs. The requester is notified.

7.9 Validation Rules

Workflows can run validation rules before they start.

Currently implemented:

- **VacationBalanceRule** — verifies the employee has sufficient leave balance for the requested vacation. Rejects the request submission if the rule fails.

> **Implementation unclear:** other validation rules may be added in future. The framework supports custom rules, but only `VacationBalanceRule` is shipped today.

7.10 Workflow Timeouts and Escalation

Each step has a configurable timeout (default per request type — see seeded definitions above). When a step times out, the system can:

- **Escalate** to the next step
- **Auto-Approve**
- **Auto-Reject**
- **Notify only** (default — does nothing automatic)

Background job: `WorkflowTimeoutProcessingJob` runs hourly to apply step timeouts.

7.11 Fallback Approver

When no eligible approver can be resolved (e.g. the role has no users in the requester's branch scope), the workflow falls back to:

- `WorkflowFallbackApproverRole` — any user with this role, or
- `WorkflowFallbackApproverUserId` — a specific user

7.12 Workflow Diagnostics

Operations administrators have access to:

- `GET /api/v1/workflows/validation-rules` — list of registered rules.
- `GET /api/v1/workflows/system-actions` — system-action audit trail.
- `GET /api/v1/workflows/role-assignment-stats` — per-user pending-approval counts (for the role assignment strategy).

7.13 Common Workflow Errors

Error	Cause	Resolution
`Insufficient balance`	Vacation balance below request	Reduce days or wait for accrual
`Workflow stuck — no approver`	Branch / role has no eligible users	Configure fallback approver
`Cannot delegate — depth exceeded`	Reached max delegation depth (default 2)	Use Return for Correction or Reject instead
`Cannot resubmit — max resubmissions reached`	Default 3 resubmissions exceeded	Submit a new request
`Self-approval not allowed`	Approver is the same as requester	Reassign workflow

`[Screenshot needed: Pending approvals with workflow visualisation]`

8. Reports and Exports

8.1 Available Reports (`/reports/...`)

Report	Route	Filters	Export
Attendance	`/reports/attendance`	Branch, Department, Employee, Date Range, Status	CSV
Leave	`/reports/leaves`	Type, Status, Date, Branch, Employee	CSV
Sessions	`/reports/sessions`	User, Date, IP	CSV
Audit Logs	`/reports/audit-logs`	Entity, User, Action, Date	CSV
Payroll Reports	`/reports/payroll`	Period, Branch, Employee	CSV / PDF
Compliance Reports	`/reports/compliance`	Country, Period	CSV / PDF
Custom Reports	`/reports/custom-reports`	User-defined	CSV / PDF

8.2 Custom Reports

Page: `/reports/custom-reports`

To create a custom report:

1. Click **New Report**.
2. Pick the entity (e.g. Vacations, Employees, Payslips).
3. Pick the fields.
4. Define filters.
5. Choose grouping and sorting.
6. Save.

To schedule a custom report:

1. Open the saved custom report.
2. Click **Schedule**.
3. Pick frequency (Daily / Weekly / Monthly).
4. Pick recipients (email addresses or specific users).
5. Pick format (CSV / PDF).
6. Save schedule.

The `ScheduledReportExecutionJob` runs hourly and dispatches due reports.

8.3 Analytics Dashboards (`/analytics/...`)

Dashboard	Route
Executive	`/analytics`
Headcount	`/analytics/headcount`
Attrition	`/analytics/attrition`
Recruitment Analytics	`/analytics/recruitment`
Training Analytics	`/analytics/training`
Leave Analytics	`/analytics/leave`
Overtime Analytics	`/analytics/overtime`
Payroll Analytics	`/analytics/payroll`
Engagement Analytics	`/analytics/engagement`

Backed by daily snapshots from `AnalyticsSnapshotJob` and monthly rollups from `MonthlyAnalyticsRollupJob`.

8.4 Report Access Control

Report	Default audience
Attendance / Leave / Audit	HR Admin, Manager (limited to team / branch), SystemAdmin
Payroll / Compliance	Payroll Administrator, HR Manager, SystemAdmin
Sessions	SystemAdmin only
Custom Reports	Per-report grant — creator + explicitly shared users
Analytics	HR Admin, SystemAdmin (drill-through scoped)

9. Notifications

9.1 In-App Notifications (SignalR)

The system uses **SignalR** for real-time in-app notifications. **All 10** notification types are delivered as in-app notifications (the bell icon in the top bar).

NotificationType	Triggered when
RequestSubmitted	A request / workflow instance is submitted (vacation, excuse, expense, etc.)
RequestApproved	A request is fully approved (workflow reaches Approved state)
RequestRejected	A request is rejected at any step
RequestDelegated	An approval task is delegated to another user
RequestEscalated	A request escalates due to timeout or SLA breach
ApprovalPending	A new approval task is awaiting action (sent to the assigned approver)
DelegationReceived	An approval task has been delegated to this user
ApprovalReminder	Reminder for pending approvals (used by background jobs)
Broadcast	Admin broadcast to multiple recipients (enum present)
SystemAlert	Operational system alert (e.g. lifecycle automation failure)

9.2 Email Notifications

The system sends emails for **authentication-related events only**:

- Password reset emails
- Email verification
- Two-factor authentication codes (where applicable)

> **Needs confirmation:** business-event email notifications (e.g. vacation approved) are **not** currently sent via email. Recipients see them only in-app via the bell icon.

9.3 Notification Recipients

Each notification has explicit recipients depending on the event:

Event	Recipients
Request submitted	The requester (confirmation) and the first-step approvers
Approval pending	Each newly-routed approver
Request approved	The requester (and possibly their manager)
Request rejected	The requester
Delegation received	The new approver
System alert	Roles in `NotificationRecipientRolesCsv` (default `HRManager,SystemAdmin`)
Reminder (background jobs)	Per-job specific (employee, manager, HR)

9.4 Notification Settings

In **Settings → Company Configuration → Notification**:

- **Enable Email Notifications** — master toggle (auth emails always send).

- **Enable SMS Notifications** — master toggle (**Implementation unclear** — SMS provider not configured by default).
- **Notify Manager on Leave Request** — toggle.
- **Notify Employee on Approval** — toggle.
- **Daily Attendance Summary Enabled** — toggle.
- **Notification Recipient Roles CSV** — comma-separated role names.
- **Alert window CSVs** — see Appendix C.

---

10. Troubleshooting

10.1 Login Issues

Problem	Resolution
`Invalid credentials`	Confirm email and password. Caps Lock off?
`Must change password` redirect	Set a new password meeting policy
Account locked	Wait the lockout duration; SystemAdmin can unlock from **People → Users**
`2FA failed`	Sync device clock; use a backup code; SystemAdmin can disable 2FA
Forgot password — no email arriving	Check Junk; SystemAdmin can reset password

10.2 Permission Issues

Problem	Resolution
`403 Forbidden` on action	The role does not grant the required (Resource, Action) — request from SystemAdmin
`404 Not Found` on a known record	Branch access excludes the record's branch — request branch-access widening
Cannot see menu item	Permission missing — request the appropriate Read/Manage permission

10.3 Validation Errors

Error	Resolution
`Required field`	Fill the field marked with `*`
`Invalid date format`	Use the date picker; do not type freeform
`Date out of range`	Confirm against the configured planning windows / retroactive limits
`Insufficient balance`	Reduce days requested or wait for accrual
`Email already exists`	Use a different email
`Branch / Department not found`	Confirm the record exists

10.4 Workflow Errors

Error	Resolution
`Workflow stuck`	Check Pending Approvals; delegate if approver is unavailable
`Failed routing — no approver`	Configure fallback approver in Company Configuration
`Self-approval not allowed`	Workflow needs reassignment
`Max resubmissions reached`	Submit a new request
`Max delegation depth reached`	Approve, Reject, or Return; cannot delegate further

10.5 Missing Data Issues

Problem	Resolution
Payslip not visible to employee	Period not yet Approved / Marked Paid — wait
Vacation balance wrong	Verify entitlement, accrued, used, pending; raise grievance if disputed
Employee disappeared from list	Filter to "All" / "Inactive" — record is retained, not deleted
Attendance status unexpected	Check Shift Assignment, Public Holidays, weekend definition; use Manual Override

10.6 Integration / Background Job Issues

Problem	Resolution
Job didn't run	Check **Operations → Operational Alerts** for failures
Approved request didn't take effect	Check **Operations → Approved Not Executed**; lifecycle automation may be disabled
Notifications not arriving	Confirm SignalR connection is not blocked by corporate proxy; refresh

10.7 Suggested Actions

For end users: 1. Refresh the page. 2. Try a different browser / Incognito window. 3. Clear browser cache. 4. Switch language and switch back if RTL layout looks off. 5. Contact your manager / HR.

For administrators: 1. Check Operational Alerts and Work Queues. 2. Check the audit log for the affected entity. 3. Inspect Company Configuration for unexpected setting changes. 4. Confirm seeded roles and branch access. 5. Escalate to IT if jobs are failing systemically.

11. Frequently Asked Questions

Why can't I see my latest payslip?

The payroll period has not yet reached **Approved** / **Paid**. Payslips become visible only after the payroll administrator approves the period. Check back after the announced pay date.

My vacation balance looks wrong.

Balance = entitlement + accrued + carryover − used − pending. Pending requests are held against your balance. If you believe a transaction is wrong, raise a grievance.

Can I edit a request after submitting?

- Pending: open and Cancel, then submit a new one.
- Returned for Correction: edit and Resubmit.
- Approved: contact HR.

Who approves my request?

Open the request after submitting; the **Workflow** tab shows every step, who has acted, and who is currently responsible.

My manager is on leave — will my request be stuck?

Workflows have configurable timeouts and escalations. After timeout, the task auto-escalates or routes to the fallback approver. Your manager can also configure a standing delegation.

Can my colleagues see my salary or payslips?

No. Salary and payslip information is visible to you, HR Manager / Payroll Administrator, your manager (limited fields per company configuration), and SystemAdmin. Peers cannot see your compensation.

How do I file a confidential grievance?

Self-Service → Services → My Grievances → New Grievance. Grievances are routed to HR only.

What happens to my data when I leave?

Your record is **retained** (not deleted) for legal, audit, and re-hire purposes. Portal access is suspended on offboarding.

Why is the system in the wrong language?

Click the language switcher in the top bar. Your choice persists.

How do I download all my payslips for the year?

Pay → My Payslips, filter by year, and download each PDF. **Implementation unclear:** bulk-download as a single ZIP is not currently provided — request from HR if needed.

Why don't I see the Approvals area?

You only see Pending Approvals if a workflow has routed a task to you. If you are a manager but the area is missing, you may not be configured as a Branch / Department Manager — ask HR.

What's the Module Launcher?

The drawer that opens when you click the gradient logo at top-left. **HR** is active. **CRM**, **Sales**, and **Inventory** are placeholders for future modules.

Are there mobile apps?

No. Both portals work on phone browsers. Add to home screen for one-tap access.

Where do I configure SMS notifications?

Settings → Company Configuration → Notification → Enable SMS Notifications. **Needs confirmation:** an SMS provider must be integrated; this is not configured out of the box.

---

12. Glossary

Term	Definition
2FA	Two-Factor Authentication using a TOTP authenticator app
Allowance	A regular pay component beyond base salary (housing, transport, etc.)
Allowance Assignment	A specific employee × allowance type × period link
Allowance Request	A workflow-driven request to grant or change an allowance
API	Application Programming Interface (the backend)
Approver Type	The kind of approver a workflow step uses (DirectManager, Role, etc.)
Audit Log	Append-only record of every data mutation
Background Job	A scheduled task running on the server
Branch	A physical or organisational sub-unit of the company
Branch Scope / Branch Access	The set of branches a user is entitled to see
Calendar Policy	The rule for computing daily rate (CalendarDays, WorkingDays, FixedBasis)
Clearance	The checklist completed during offboarding
Comp-Off	Compensatory time off accrued for working on holidays / off-days
Company Configuration	The singleton settings record
Domain Event	An in-process event that lifecycle automation listens to
End-of-Service / EOS	Statutory benefit paid on offboarding
Excuse	An hour-based exit during a working day
HR	Human Resources
HRMS	Human Resource Management System
JWT	JSON Web Token (used for authentication)
Lifecycle Automation	Automatic actions on lifecycle events (offer accepted, etc.)
Module Launcher	The drawer listing ERP modules (HR active; CRM/Sales/Inventory placeholder)
Onboarding Process	Per-employee instance of an Onboarding Template
PIP	Performance Improvement Plan
Pre-Hire	Employee state after offer acceptance, before onboarding completes
Resource	A permission resource (Employee, Vacation, etc.)
Role	A named set of permission grants
Role Assignment Strategy	How a Role-typed approver is picked among eligible users
Run Audit	Append-only trail of every payroll-period action
Salary Adjustment	The audit record for a base-salary change
Self-Service Portal	The employee-facing application
SignalR	The real-time messaging technology used for in-app notifications
Suspended	The employee state during offboarding (data retained, portal disabled)
System Administrator	The superuser role with full cross-company access
Timesheet	Per-period log of hours worked on projects

TOTP	Time-based One-Time Password (used in 2FA)
Workflow Definition	A configured approval chain for a request type
Workflow Instance	A single in-flight request following a workflow definition

13. Appendix

Appendix A — Initial / Seeded Login Credentials

> **Security:** these credentials are seeded for first-time setup and sample data. **Change passwords on go-live and disable any sample accounts not needed in production.**

A.1 System administrator accounts

Email	Password	Role
`systemadmin@system.local`	`TempP@ssw0rd123!`	SystemAdmin
`tecaxleadmin@system.local`	`TempP@ssw0rd123!`	SystemAdmin

A.2 Sample employees (loaded by `RunSampleData` tool)

All sample employees share password `Emp@123!` with **Must Change Password** flagged.

Branch Managers:

Email	Name	Branch
`ahmed.rashid@company.com`	Ahmed Al-Rashid	HQ Riyadh
`khalid.otaibi@company.com`	Khalid Al-Otaibi	Jeddah
`mohammed.qahtani@company.com`	Mohammed Al-Qahtani	Dammam
`salma.khaldi@company.com`	Salma Al-Khaldi	Madinah
`fahad.harbi@company.com`	Fahad Al-Harbi	Makkah

Sample Department Managers (HQ Riyadh):

Email	Name	Department
`sara.fahad@company.com`	Sara Al-Fahad	HR
`omar.nasser@company.com`	Omar Al-Nasser	IT
`fatima.zahrani@company.com`	Fatima Al-Zahrani	Finance
`youssef.shamrani@company.com`	Youssef Al-Shamrani	Operations

Regular employees: pattern `{firstname}.{lastname}@company.com`, password `Emp@123!`.

Appendix C — Status Lifecycle Tables

Payroll Period

```
Draft → Processing → Processed → Approved → Paid (locked)
                        ↑                      ↓
                        └─ Recalculate          └─ Admin Unlock (with reason)
                                                     ↓
                                                (back to Approved)
                                                     ↑
              Cancelled ← Draft / Processing
```

Workflow Instance

```
Pending → InProgress → Approved
                    ↘ Rejected
                    ↘ ReturnedForCorrection → Resubmitted (back to Pending)
                    ↘ Cancelled
                    ↘ Expired
                    ↘ FailedRouting (terminal — fallback approver)
```

Vacation / Excuse / Remote Work

```
Pending → Approved | Rejected | Cancelled
        ↘ ReturnedForCorrection → Resubmitted → Pending
```

Onboarding Process

```
NotStarted → InProgress → Completed
                        ↘ OnHold → InProgress
                        ↘ Cancelled
```

Application (Recruitment)

```
New → Screening → ShortListed → InterviewScheduled → Interviewing → OfferPending → OfferExtended → OfferAccep
                                                                                                ↘ OfferDecli
                                                                                                ↘ Withdrawn
       ↘ Rejected (any stage)
```

Final Settlement

```
Draft → Calculated → PendingApproval → Approved → Paid
                                                ↘ Cancelled
```

Loan Application

```
Draft → Pending → Approved → Active → FullyPaid
                ↘ Rejected
                ↘ Cancelled
                ↘ DefaultedPayment
```

Expense Claim

```
Draft → Submitted → PendingApproval → Approved → Reimbursed | PartiallyReimbursed
                                    ↘ Rejected
                                    ↘ Cancelled
```

Asset

```
Available → Assigned → Returned (back to Available) | Lost | Damaged
         ↘ InMaintenance → Available
         ↘ Retired
         ↘ Disposed
```

Appendix D — Role / Permission Matrix (sample)

Resource × Action	SystemAdmin	Admin	Manager	Employee
Employee, Read	Y	Y	Team only	Self only
Employee, Create	Y	Y	—	—
Employee, Update	Y	Y	—	Self profile (subject to approval)
Vacation, Approve	Y	Y	Team requests	—
Vacation, Create	Y	Y	Y	Self only
Payroll, Process	Y	Y	—	—
Payroll, Approve	Y	Y	—	—
Settings, Configure	Y	(depends)	—	—
User, Manage	Y	(depends)	—	—
Role, Manage	Y	—	—	—
Permission, Manage	Y	—	—	—
System, Configure	Y	—	—	—
Audit, Access	Y	(depends)	—	—

`Y` = full access. The Manager and Employee roles are **editable** — HR adjusts the matrix to fit company policy.

Appendix E — Configuration Reference (Company Settings)

The system has **85** company-configuration settings, grouped as follows.

General (6)

- FiscalYearStartMonth
- WeekStartDay
- DateFormat
- TimeFormat
- NumberFormat
- DefaultTimeZoneId

Attendance (7)

- AttendanceDuplicateSuppressionSeconds
- EnableBiometricAttendance
- EnableManualAttendance
- LateGracePeriodMinutes
- EarlyLeaveGracePeriodMinutes
- TrackBreakTime
- MinimumWorkingHoursForPresent

Leave (6)

- AllowNegativeLeaveBalance
- RequireAttachmentForSickLeave
- MinDaysBeforeLeaveRequest
- AllowHalfDayLeave
- AllowLeaveEncashment
- LeaveYearStart

Payroll (4)

- PayrollCutOffDay

- PayrollCurrency
- EnableEndOfServiceCalc
- SalaryCalculationBasis

Approval (6)

- AutoApproveAfterTimeout
- DefaultApprovalTimeoutHours
- AllowSelfApproval
- RequireApprovalComments
- WorkflowFallbackApproverRole
- WorkflowFallbackApproverUserId

Notification (7)

- EnableEmailNotifications
- EnableSmsNotifications
- NotifyManagerOnLeaveRequest
- NotifyEmployeeOnApproval
- DailyAttendanceSummaryEnabled
- NotificationRecipientRolesCsv
- (plus alert window CSVs — see below)

Security (7)

- PasswordExpiryDays
- MaxLoginAttempts
- SessionTimeoutMinutes
- Require2FA
- PasswordHistoryCount
- PasswordMinLength
- LoginLockoutPolicyJson

Lifecycle Automation (15)

- LifecycleAutomationEnabled (master kill-switch)
- AutoCreateOnboardingOnOfferAcceptance
- DefaultOnboardingTemplateId
- CreateEmployeeInactiveAtOfferAcceptance
- AutoActivateEmployeeOnOnboardingComplete
- OnboardingCompletionRequiresAllRequiredTasks
- OnboardingCompletionRequiresAllRequiredDocuments
- AutoCreateTerminationOnResignationApproved
- AutoCreateClearanceOnTermination
- DefaultClearanceTemplateId
- AutoSuspendEmployeeOnTerminationCreated
- RequireClearanceCompleteBeforeFinalSettlement
- AutoEnableFinalSettlementCalcOnClearanceComplete
- AutoDeactivateEmployeeOnFinalSettlementPaid
- ContractExpiredAction (NotifyOnly / AutoMarkExpired / Suspend / Deactivate)

Validation / Limits (10)

- MaxUploadSizeMb
- MaxVacationDaysPerRequest
- MaxVacationFuturePlanningYears
- MaxShiftGracePeriodMinutes
- ExcuseBackwardWindowDays

- ExcuseForwardWindowDays
- OvertimeConfigMaxFutureDays
- AttendanceCorrectionMaxRetroactiveDays
- MaxWorkflowDelegationDepth (default 2)
- MaxWorkflowResubmissions (default 3)

Alert / Reminder Windows (12)

- ContractExpiryAlertDaysCsv (default `30,15,7`)
- VisaExpiryAlertDaysCsv (default `90,60,30,15,7`)
- ReviewReminderDaysCsv
- LoanRepaymentReminderDays
- FrozenWorkflowCleanupDays
- DocumentExpiryAlertDaysCsv
- AssetWarrantyExpiryAlertDaysCsv
- AssetOverdueReturnAlertDaysCsv
- TrainingSessionReminderDaysCsv
- SuccessionPlanReminderDaysCsv
- TimesheetSubmissionReminderDaysBefore
- GrievanceSlaAlertDaysCsv

Default Values (1)

- DefaultProbationDays

Appendix F — Module → Controller Mapping

The full controller list comprises **139** files. A condensed mapping of module to primary controller(s):

Module	Primary controller(s)
Authentication	AuthController
Users	UsersController
Employees	EmployeesController, EmployeeDetailsController
Roles & Permissions	RolesController, PermissionsController
Branches & Departments	BranchesController, DepartmentsController
Shifts	ShiftsController, ShiftAssignmentsController, ShiftSwapRequestsController, OnCallSchedulesController
Attendance	AttendanceController, AttendanceCorrectionRequestsController
Vacations	EmployeeVacationsController, VacationTypesController, LeaveBalancesController
Excuses	EmployeeExcusesController, ExcusePoliciesController
Remote Work	RemoteWorkRequestsController, RemoteWorkPoliciesController
Compensatory Off / Encashment	CompensatoryOffsController, LeaveEncashmentsController
Public Holidays	PublicHolidaysController
Contracts	EmployeeContractsController
Transfers / Promotions	EmployeeTransfersController, EmployeePromotionsController
Salary Adjustments /	SalaryAdjustmentsController, SalaryStructuresController, EmployeeSalariesController

Salary Structures	
Allowances	AllowanceTypesController, AllowancePoliciesController, AllowanceAssignmentsController, AllowanceRequestsController
Job Grades	JobGradesController
Recruitment	JobRequisitionsController, JobPostingsController, CandidatesController, JobApplicationsController, InterviewSchedulesController, InterviewFeedbacksController, OfferLettersController
Onboarding	OnboardingTemplatesController, OnboardingProcessesController, OnboardingTasksController
Offboarding	ResignationRequestsController, TerminationsController, ClearanceController, FinalSettlementsController, EndOfServiceController, ExitInterviewsController, EndOfServicePoliciesController
Payroll	PayrollPeriodsController, PayrollSettingsController, OvertimeConfigurationController
Benefits	BenefitPlansController, BenefitEnrollmentsController, BenefitClaimsController, OpenEnrollmentPeriodsController
Documents	DocumentCategoriesController, EmployeeDocumentsController, CompanyPoliciesController, LetterTemplatesController, LetterRequestsController
Announcements	AnnouncementCategoriesController, AnnouncementsController
Assets	AssetCategoriesController, AssetsController, AssetAssignmentsController, AssetMaintenanceController
Employee Relations	GrievancesController, DisciplinaryActionsController, InvestigationsController, CounselingRecordsController
Surveys	SurveyTemplatesController, SurveyDistributionsController, SurveyResponsesController
Expenses	ExpenseCategoriesController, ExpensePoliciesController, ExpenseClaimsController
Loans	LoanTypesController, LoanPoliciesController, LoanApplicationsController, SalaryAdvancesController
Performance	PerformanceReviewCyclesController, PerformanceReviewsController, GoalDefinitionsController, CompetencyFrameworksController, PerformanceImprovementPlansController, FeedbackRequestsController
Training	TrainingCategoriesController, TrainingCoursesController, TrainingProgramsController, TrainingSessionsController, TrainingEnrollmentsController, TrainingEvaluationsController, TrainingAttendanceController, EmployeeCertificationsController, TrainingBudgetsController
Succession	KeyPositionsController, TalentProfilesController, SuccessionPlansController, CareerPathsController
Timesheets	ProjectsController, ProjectTasksController, TimesheetPeriodsController, TimesheetsController
Approvals & Workflows	ApprovalsController, ApprovalExecutionController, WorkflowsController
Operations	OpsDashboardController, OperationalAlertsController, GlobalSearchController, LifecycleAutomationController
Reports & Analytics	ReportsController, AnalyticsController, CustomReportsController, SavedDashboardsController, AuditLogsController, SessionsController
Notifications	NotificationsController
Self-Service	PortalController
Files	FilesController
Configuration	CompanyConfigurationController

Appendix G — Domain Events (Lifecycle Automation)

The system raises **7** domain events powering lifecycle automation:

Event	Triggered when	Default downstream action
OfferAcceptedEvent	Offer letter accepted by candidate	Create pre-hire Employee + start Onboarding Process
OnboardingCompletedEvent	All required onboarding tasks complete	Stamp milestone; activate employee (if auto-activate is on)
ResignationApprovedEvent	Resignation Request approved	Create Termination record (if auto-create is on)
TerminationCreatedEvent	Termination record created	Create Clearance Checklist + suspend employee (if auto-suspend is on)
ClearanceCompletedEvent	Clearance checklist complete	Enable Final Settlement (if gated)
FinalSettlementPaidEvent	Final Settlement marked Paid	Deactivate employee (if auto-deactivate is on)
ContractExpiredEvent	`ContractExpiryAlertJob` finds an expired contract	Action per `ContractExpiredAction` setting

Every automation attempt is recorded in the lifecycle audit log with a `LifecycleAutomationStatus`: `Succeeded`, `Skipped`, `Failed`, `DuplicateSuppressed`, `Disabled`, `MissingPrerequisite`.

Appendix H — Companion Manuals

This document is the master User Manual. Two role-targeted manuals also exist:

- **`ADMIN_USER_MANUAL.md`** — focused, user-friendly walkthrough for HR / payroll / IT / managers using the admin portal.
- **`SELF_SERVICE_USER_MANUAL.md`** — focused, user-friendly walkthrough for regular employees and team managers using the self-service portal.

Document version: v14.9 **Last updated:** 2026-04-26 **Owner:** TecAxle HRMS — HR Operations
